The Licensing Association Thailand (LAT)—founded by the Siam Cement PLC (SCG), Tilleke and Gibbins, Biodiversity-Base Economy Development Office (BEDO), National Science and Technology Development Agency (NSTDA), and World IP Solutions (WIPS Co., Ltd.) with support from the Asia-Pacific Research and Training Network on Trade (ARTNeT), is a newly formed association promoting licensing activities in Thailand with a strong commitment to becoming LES Thailand.

With the backing of Professor Dr. Heinz Goddar, who early on saw the potential for Thailand to host a new chapter of LESI, Yvonne Chua, former President of LESI who initiated the forming of a Thai society, and the tremendous support of Patricia Bunye, LES Philippines and Katsumi Harashima, Junko Sugimura, Sumiko Kobayashi, and Ichiro Nakatomi from LES Japan, LAT has now been established. Further, LAT has successfully filed the application for becoming a member of LESI at the LESI Board of Delegates Meeting on May 2014 in Moscow. With this, LAT has had a great start to becoming an LESI chapter.

October 13, 2014 marked the inaugural event of LAT on the topic of “ASEAN Economic Community (AEC)—A New Market for IP Monetization”—a highly successful event where some of the challenges faced by companies seeking
LESI—Maintaining An International Flavor

By Arnaud Michel,
President, LES International

Dear Friends and LES members,

It is my pleasure to update you on the things that have been keeping me busy for LESI these past few weeks.

As you know from my previous message, it is particularly important in the current economic environment for our National Societies to keep an international approach, to emphasize regional activities, and to give young members an increasing role in our organization.

Due to our new governance system, this was the first year after several, (decades,) that no LESI International Delegates Meeting was organized in addition to the LES (USA & Canada) Annual Meeting.

To maintain an international flavor, LESI organized a Board Meeting in San Francisco as well as a joint Board Meeting with LES (USA & Canada). I would like to particularly thank Russell Levine for the extreme friendship that he has shown to LESI in general and to me, (particularly,) during his term as president of LES (USA & Canada) and during the conference. LESI wishes great success to his successor, Pamela Demain.

We have also organized a meeting of the National Presidents and the Past International Presidents in San Francisco.

We owe a lot to LES (USA & Canada). Without them, we would not exist. LES (USA & Canada) was celebrating its 50th anniversary and I had the honor and pleasure to make the opening remarks. I recalled that after only a few years, LES (USA & Canada) very rapidly realized that the correct outlook for development of the IP business was not national but international, and began the creation of other LES National Chapters, and then LESI to facilitate their coordination.

The LES Members should take advantage of the fabulous skills of 10,000 highly experienced IP practitioners around the world across 32 societies covering around 90 countries.

I left San Francisco to attend the Grand Opening Ceremony of the Licensing Association of Thailand (LAT), which I hope will soon become our 33rd LES Chapter. I also had the pleasure of giving the opening speech.

The conference gathered around 130 participants from Thailand, but also from other countries of the Asian and South East Asian region, and also featured International speakers.

LAT is an excellent example of what the LES family looks for when welcoming a new chapter.

President’s Message, continued on Page 3
The new association benefits from the heavy involvement of industry, notably from our friends from SCG and other industrial companies. I must pay a special thank you and congratulations to Dr. Wilaiporn Chetanachan, Corporate Technology Office-Director of SCG, and her team for supporting and organizing this event so well.

Service providers were present, both from local firms and international firms with officers in Thailand and in South East Asia. Alan Adcock, Partner and Deputy Director, IP, of Tilleke & Gibbins, has also been a cornerstone in the organization of the meeting and more generally of LAT.

Universities and research centers are also members of LAT, such as the National Science Technology and Innovation Policy Office (STI) of Thailand.

The three LES families (industry, service providers, and universities) are, therefore, well represented in the association’s very open and constructive outlook. No doubt this future chapter will find great success, both in Thailand and in the South East Asia region.

I left Bangkok to attend the annual meeting of LES China in Shanghai where I was delighted to be given the opportunity to make the opening remarks and emphasize the international themes which are so close to my heart.

I would like to give special thanks to Yibin Feng, secretary of the Board of LES China, who has been extremely supportive in the organization of my visit.

I left our friends at SIPO with a copy of our latest survey on royalty rates, which was a great example of how unique Around the World with LES is and how deeply we are involved with the industry.

I ended my trip with a meeting at the China International Technology Transfer Center (CITTC). This platform is an entry point into China’s extensive emerging market with its connections all around China. It will collect information on the needs of Chinese industry for new technologies and their licensing-in.

I am really happy to be able to share with you these exciting moments which show how Around the World with LES really is dynamic and well thought of. Amitiés.
Antonio Gentile, a 2013 LES Foundation Business Plan Competition finalist from Italy’s Università del Salento, recently joined a crowd of supporters gathered to celebrate the 2015 Competition Kick Off at a joint Emerging Enterprises Committee/LES Foundation reception hosted during the LES (USA & Canada) Annual Meeting in San Francisco.

“The Competition was such a valuable experience for our team, not only because of what we learned about IP and strategy, but also because it introduced us to the vibrant international LES community,” said Antonio Gentile, now a Fulbright Scholar. “I was thrilled to celebrate the 2015 kick off and brought my friends along (also entrepreneurs) to enjoy some LES fellowship and networking.”

This year the Foundation will build on the highly successful virtual mentoring component of its now 11-year-old annual Competition by hosting a new virtual final round to allow more teams from around the globe to advance and compete in the finals.

“One of the Foundation’s objectives in moving to a virtual final round is to significantly expand the number of international teams that participate by making the Competition more accessible,” said LES Foundation President Gary Fedorochko.

The Foundation is also looking to more actively integrate students into the LES community by cultivating connections between student teams and their national societies or local chapters.

Also new this year will be an IP Services Showcase which will allow students to select and sample IP services provided by LES volunteers to assess how they might benefit their businesses in the future.

“We are excited to be expanding our opportunities and offerings for student participants and are pleased to have so many exciting ways for LES members to get involved,” said 2015 Competition Director, Annemarie Meike. “Helping students learn and grow through the Competition experience is enormously enjoyable and rewarding.”

So, do you have a service you’d like to include in the IP Services Showcase? Would you like to be an official Competition sponsor or sponsor an in-kind prize? Do you have time to mentor a team by phone or to judge a few business plans in your area of expertise? The Foundation has volunteer opportunities to suit even the busiest schedules. Please email us at Bplan@lesfoundation.org to let us know how you would like to be involved.

- Be a Virtual Mentor—provide mentorship assistance to teams by phone.
- Be a Virtual IP Services Sponsor—offer to preview your professional services for a team that selects you.
- Alert a business school professor to the event and encourage the school’s participation.
- Judge a few plans in the first round.
- Be an In-kind Donor or Competition Sponsor.
- Make a cash donation.

LAT, continued from Page 1

to license out their IP in ASEAN region were constructively discussed. The conference covered a variety of topics ranging from IP portfolio management to licensing strategies and all the way to successful licensing stories from public and private sectors. The conference attracted about 120 IP professionals from several countries including Singapore, Philippines, Japan, Korea, India, Hong Kong, France, and USA. Out of 120 participants, about 30 percent were from industries, 30 percent from public sectors and universities, and 40 percent were IP professionals from consulting firms.

The conference was sparked by a striking performance from a group of Thai martial art experts. Thereafter, the President of LAT, Dr. Wilaiporn Chetanachan from SCG delivered the opening speech. The organizers were honored to have the Director General of the Department of Intellectual Property of Thailand as the chairman of the ribbon-cutting ceremony, who said that the event was “a key stepping-stone to leverage IP practitioners” for the Thai community and beyond. Following this were the keynote speeches from Arnaud Michel, President of LESI, and Yvonne Chua. Showing a strong determination of becoming an active LES chapter, the Vice President of LAT, Darani Vachanavuttivong from Tilleke and Gibbins, introduced an upcoming event in December during her closing remarks. She continued to mention the importance of having an engagement plan for supporting the young community in Thailand as highlighted by Arnaud during the conference. On behalf of LAT, Darani also expressed LAT’s deepest gratitude towards the continuous support from Yvonne, Arnaud, Patricia, Ichiro including other mentors from LES Japan, Audrey and Yusarn from LES Singapore, and JJ Kim from LES Korea.

Most importantly, LAT would not have achieved this level of success without strong teamwork and faith among co-founding members. By holding hands, LAT aims to enhance the nation’s level of sophistication in IP and licensing to ultimately strengthen and build a sustainable Thai licensing community.

GTIF Award Nominations

Societies may now submit award nominations for the Global Technology Impact Forum (GTIF). LESI instituted two special awards to recognize those initiatives with outstanding impact in the building of IP goodwill.

LESI National IP & Technology Transfer Policy Award

Leading international IP organizations are certainly in the best position to look at their national policies and their social and economic impact.

LESI Award to an Outstanding Humanitarian Technology Transfer Initiative

This includes not-for-profits in need of technologies, technology providers, and/or companies with the common interest of using the inventiveness of people to help those in need.

Nominations will be accepted until January 31, 2015. The Awards presentation will be made April 15, 2015 at the GTIF event in Brussels, Belgium.

For nominations or questions, please contact: GTIF Awards Vice-Chair Ningling Wang (Ningling.Wang@finnegan.com) or Chris Katopis, Executive Administrator, (ckatopis@lesi.org).
Joint Seminar—LES Austria, LES Czech Republic And LES Hungary

By Robert Teets

On 03 October 2014, the national societies of LES Austria, LES Czech Republic and LES Hungary for the first time held a—long planned but so far never realized—joint event of a licensing seminar. A tag line for this seminar was readily suggested by the geographic relation of the three hosting societies, i.e., “Licensing Challenges in the CEE Region.” As most convenient location for all members of the three involved national LES societies as well as other participants from those countries, the city of Bratislava in Slovakia was unanimously picked; the seminar finally took place in the nicely located Hotel Mercure Bratislava Centrum in the city centre.

As for the seminar, a wide array of industry sectors were covered through excellent speeches and presentations given by esteemed speakers from the three countries involved. After a welcome address and introductory words by the three national presidents, Alexander Cizek, Vojtech Chloupek and Mihaly Lantos, as well as by Thomas Adocker as chair of the LESI Young Members Congress, Ms. Katerina Bydzovska, in-house counsel of Skoda Auto, spoke about IPR licensing and merchandising issues in the automotive industry, and Mr. Marek Houda, IPR manager at inovacentrum of the Czech Technical University, presented on IP issues in the technical university field. Mr. Ákos Bartha, legal counsel at ELI Hungary, introduced the IP policy of the Extreme Light Infrastructure Venture called ELI-HU Ltd as well as principles of its IP policy; whereas, Mr. István Molnár, patent attorney at Danubia Patent & Law Office, presented models for the transfer of technology at ELI HU Ltd, in particular R&D agreements, licensing agreements as well as spinning out transactions to science parks, investors and other third parties. As for Austria, Mr. Mathias Redlberger, CEO of REBLOC GmbH, gave interesting insights into the licensing scene in the precast concrete industry and related experience and challenges with the company owned safety barrier system. Ms. Karin Hofmann, Technology Transfer Manager at the Vienna University of Technology, presented on the role of the university as a player in innovation systems, and Mr. Michael Stadler, patent attorney at Wildhack Jellinek, spoke to the audience about third party effects of patent license agreements.

The event was set up as a full one-day seminar and the speakers as well as their speeches and presentations were very well received by the audience, which was characterized by a large number of participants stemming from the four involved countries and counted about 50 attendees, representing the university sector, the industry, scientific institutes and finally technology transfer and industrial property professionals. Apart from the high level program, there was plenty of time for networking between the sessions, which strengthened the friendship contacts and business relations among the attendees.

The outcome of that first joint LES event certainly pleased the organizing societies: LES Austria, LES Czech Republic and LES Hungary. In light of this success, it is envisaged to continue a joint LES seminar of those three national LES chapters on a yearly recurring basis in the future.
“A penny for their thoughts!”
Maybe that’s crossed your own mind once or twice when dealing with EPO examiners and their search reports and communications?

NEW EDITION!
POST-GRANT PATENT PRACTICE, SECOND EDITION
By Bruce H. Stoner, Jr.; Nancy J. Linck; Carol A. Spiegel; and Richard Torczon
American Intellectual Property Law Association (AIPLA)

Post-Grant Patent Practice, Second Edition is an invaluable reference that provides guidance to patent professionals regarding all U.S. Patent and Trademark Office (PTO) post-issuance procedures addressing possible mistakes made during the prosecution of a patent application, including mistakes made by the PTO. This treatise from Bloomberg BNA marks a turning point between the ebb of the first-to-invent system and the flow of the “first-inventor-to-file” system. The treatise examines many important procedures, including reissue, ex parte and inter partes reexamination, disclaimers, certificates of correction, and interference practice.

The Second Edition of Post-Grant Patent Practice significantly and thoroughly revises the First Edition based on the Leahy-Smith America Invents Act’s U.S. Code sections, technical corrections, and final regulations, and analyzes federal case law and PTAB decisions issued since the First Edition was published. It also adds significantly expanded discussion of AIA statutes and final regulations governing inter alia, discovery, claim construction and amendment, real party in interest, joinder, and concurrent/multiple proceeding. Finally, the Second Edition adds revised tables and appendices comparing trial practice rules with interference rules, comparing final rules for inter partes review with those for post-grant review and covered business method patent review, and includes the PTO’s final regulations and the U.S. Code sections governing post-grant practice, making it a complete reference guide to post-grant practice.

NEW EDITION:
INTELLECTUAL PROPERTY TECHNOLOGY TRANSFER, SECOND EDITION
Aline C. Flower, Editor-in-Chief

Intellectual Property Technology Transfer, Second Edition, provides the legal framework for the licensing and research transactions between industry and federally and privately funded research laboratories over technology development and transfer and associated intellectual property (IP) rights. Mapping out the legal landscape in the burgeoning field of technology transfer, this resource provides a comprehensive analysis of all of the central legal issues confronting and governing the interactions between industry interests and laboratories conducting basic research.

The revised, reorganized, and expanded Second Edition includes a comprehensive framework for dealing with the array of legal issues associated with federally funded innovation and allocation of IP rights; a new approach to export control law and regulation that provides clear guidance on how to identify export control issues in a university setting and practical steps to take for managing those issues, including specific case study scenarios; an analysis of university technology transfer rights covering a wide range of university activity within both tech transfer and the sponsored research divisions; an integrated treatment of infringement liability and sovereign immunity exploring the intricate contours of Eleventh Amendment and state sovereign immunity for infringement and products liability claims; a discussion of tech transfer and research collaborations from a globally-oriented perspective that establishes a framework for entities considering global technology partnerships and provides key considerations for successful research sponsorship and technology transfer; and an exploration of the purpose and policy behind university conflict of interest policies and consideration of alternative models to traditional tech transfer, including start-ups and captive research and commercialization entities.
