How can LESI or other LES Societies further support you?

LESI and other LES Societies can further support us in the establishment of an IP Valuation Committee, the development of a valuation framework suitable for the Thai context, and capacity building for Thai IP and licensing professionals. Support in the form of knowledge sharing, access to international best practices, expert speakers, and training materials on IP valuation would be particularly valuable. Collaboration with experienced practitioners from other countries would also help strengthen local expertise and ensure the framework aligns with internationally accepted standards.
